

DBKDA 2022

Foreword

The Fourteenth International Conference on Advances in Databases, Knowledge, and Data Applications (DBKDA 2022), held between May 22 – 26, 2022, continued a series of international events covering a large spectrum of topics related to advances in fundamentals on databases, evolution of relation between databases and other domains, data base technologies and content processing, as well as specifics in applications domains databases.

Advances in different technologies and domains related to databases triggered substantial improvements for content processing, information indexing, and data, process and knowledge mining. The push came from Web services, artificial intelligence, and agent technologies, as well as from the generalization of the XML adoption.

High-speed communications and computations, large storage capacities, and load-balancing for distributed databases access allow new approaches for content processing with incomplete patterns, advanced ranking algorithms and advanced indexing methods.

Evolution on e-business, ehealth and telemedicine, bioinformatics, finance and marketing, geographical positioning systems put pressure on database communities to push the ‘de facto’ methods to support new requirements in terms of scalability, privacy, performance, indexing, and heterogeneity of both content and technology.

We take here the opportunity to warmly thank all the members of the DBKDA 2022 Technical Program Committee, as well as the numerous reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and efforts to contribute to DBKDA 2022. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations, and sponsors. We are grateful to the members of the DBKDA 2022 organizing committee for their help in handling the logistics and for their work to make this professional meeting a success.

We hope that DBKDA 2022 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the fields of databases, knowledge and data applications.

We are convinced that the participants found the event useful and communications very open. We also hope that Venice provided a pleasant environment during the conference and everyone saved some time for exploring this beautiful city

DBKDA 2022 Chairs:

DBKDA 2022 Steering Committee

Fritz Laux, Reutlingen University, Germany

Andreas Schmidt, Karlsruhe Institute of Technology / University of Applied Sciences

Erik Hoel, Esri, USA

Lisa Ehrlinger, Johannes Kepler University Linz, Austria / Software Competence Center Hagenberg GmbH, Austria

Peter Kieseberg, St. Pölten University of Applied Sciences, Austria

DBKDA 2022 Publicity Chairs

Hannah Russell, Universitat Politècnica de València (UPV), Spain

Mar Parra, Universitat Politecnica de Valencia, Spain
