

AFIN 2018

Forward

The Tenth International Conference on Advances in Future Internet (AFIN 2018), held between September 16, 2018 and September 20, 2018 in Venice, Italy, continued a series of events dealing with advances on future Internet mechanisms and services.

We are in the early stage of a revolution on what we call Internet now. Most of the design principles and deployments, as well as originally intended services, reached some technical limits and we can see a tremendous effort to correct this. Routing must be more intelligent, with quality of service consideration and 'on-demand' flavor, while the access control schemes should allow multiple technologies yet guarantying the privacy and integrity of the data. In a heavily distributed network resources, handling asset and resource for distributing computing (autonomic, cloud, on-demand) and addressing management in the next IPv6/IPv4 mixed networks require special effort for designers, equipment vendors, developers, and service providers.

The diversity of the Internet-based services requires a fair handling of transactions for financial applications, scalability for smart homes and ehealth/telemedicine, openness for web-based services, and protection of the private life. Different services have been developed and are going to grow based on future Internet mechanisms. Identifying the key issues and major challenges, as well as the potential solutions and the current results paves the way for future research

We take here the opportunity to warmly thank all the members of the AFIN 2018 technical program committee, as well as all the reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated their time and effort to contribute to AFIN 2018. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

We also gratefully thank the members of the AFIN 2018 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that AFIN 2018 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the field of future internet. We also hope that Venice, Italy provided a pleasant environment during the conference and everyone saved some time to enjoy the unique charm of the city.

AFIN 2018 Chairs

AFIN Steering Committee

Renwei (Richard) Li, Future Networks, Huawei, USA

Eugen Borcoci, University Politehnica of Bucharest, Romania

Alex Galis, University College London, UK

R.D. van der Mei (Rob), Centre for Mathematics and Computer Science (CWI), the Netherlands

Jun Peng, University of Texas - Rio Grande Valley, USA

Hiroyuki Sato, University of Tokyo, Japan

Sergio Ilarri, University of Zaragoza, Spain

Christos Bouras, University of Patras and Research Academic Computer Technology Institute,
Greece

Adel Al-Jumaily, University of Technology, Sydney, Australia

AFIN Research/Industry Committee

Kiran Makhijani, Huawei Technologies, USA

Alexander Papaspyrou, adesso GmbH, Germany

Martin Zelm, INTEROP - Virtual Lab, Brussels, Belgium
