GREEN 2017

Forward

The Second International Conference on Green Communications, Computing and Technologies (GREEN 2017), held between September 10-14, 2017 in Rome, continued the inaugural event focusing on current solutions, stringent requirements for further development, and evaluations of potential directions. The event targeted to bring together academia, research institutes, and industries working towards green solutions.

Expected economic, environmental and society wellbeing impact of green computing and communications technologies led to important research and solutions achievements in recent years. Environmental sustainability, high-energy efficiency, diversity of energy sources, renewable energy resources contributed to new paradigms and technologies for green computing and communication.

Economic metrics and social acceptability are still under scrutiny, despite the fact that many solutions, technologies and products are available. Deployment at large scale and a long term evaluation of benefits are under way in different areas where dedicated solutions are applied.

The conference had the following tracks:

- Improving Green-ness
- Smart Energy and Smart Grid

We take here the opportunity to warmly thank all the members of the GREEN 2017 technical program committee, as well as all the reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to GREEN 2017. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

We also gratefully thank the members of the GREEN 2017 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that GREEN 2017 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the field of green communications, computing and technology. We also hope that Rome, Italy provided a pleasant environment during the conference and everyone found some time to enjoy the historic charm of the city.

GREEN 2017 Chairs

GREEN Steering Committee

Carlos Becker Westphall, Federal University of Santa Catarina, Brazil Wilfried Elmenreich, University of Klagenfurt, Austria

Bo Nørregaard Jørgensen, University of Southern Denmark, Denmark Coral Calero, University of Castilla-La Mancha, Spain

GREEN Research/Industry Committee

Steffen Fries, Siemens AG, Germany Daisuke Mashima, Advanced Digital Sciences Cener, Singapore Nanpeng Yu, University of California, Riverside, USA Enrique Romero-Cadaval, University of Extremadura, Spain
