Table of Contents

Specifying Desired Behaviour in Hybrid Central/Self-Organising Multi-Agent Systems 1
Yaser Chaaban and Christian Muller-Schloer

A Survey of Robustness in Multi-Agent Systems 7
Yaser Chaaban and Christian Muller-Schloer

An Overview of Data Privacy in Multi-Agent Learning Systems 14
Kato Mivule, Darsana Josyula, and Claude Turner

Multi-agent System for Skills Sharing in Sustainable Development Projects 21
Olivier Chator, Jean-Marc Salotti, and Pierre-Alexandre Favier

A Model of Burden Sense from Psychophysical Factors in Lifting Action with and without Power Assist Device 27
Kosuke Takahashi, Takayuki Tanaka, Nara Hiroyuki, Kaneko Shun'ichi, and Eiichi Yoshida

P300 Brain-Computer Interface Performance: a Dry Electrode Study 34
Arnau Espinosa, Guenter Edlinger, and Christoph Guger

The Cerebellum in the Ouroboros Model, the "Interpolator Hypothesis" 37
Knud Thomsen

Brain Computer Interfaces as Stroke Rehabilitation Tools: Optimization of current strategies 42
Arnau Espinosa, Rupert Ortner, Christoph Guger, and Danut Irimia

When Brain Informs Us About Mind: a Neuro-Ergonomic Approach to Study Web Sites. 48
Elena Guercio, Simona Collina, Roberto Montanari, Chiara Ferrarini, and Gabriele Garbin

The Neurological Scaling of Human Expertise 53
Terry Bossomaier, Andrew Delaney, James Crane, Fernand Gobet, and Mike Harre

Basic Study for Human Spatial Cognition Based on Brain Activity During Car Driving 59
Shunji Shimizu, Hiroaki Inoue, Hiroyuki Nara, Fumikazu Miwakeichi, Nobuhide Hirai, Senichiro Kikuchi, Satoshi Kato, and Eiju Watanabe

Consideration for Evaluation Method of Human Behavior Based on Brain Activity 65
Hiroaki Inoue, Shunji Shimizu, Hiroyuki Nara, Fumikazu Miwakeichi, Takeshi Tsuruga, Nobuhide Hirai, Senichiro Kikuchi, Satoshi Kato, and Eiju Watanabe

Forecasting Negotiation Counterpart's Offers: A Focus on Session-long Learning Agents 71
Marisa Masvoula

Using Ontology and RFID Technology to Develop an Agent-based System for Campus-safety Management 77
Sheng-Tzong Cheng and Jian-Pan Li

Compositions of Fuzzy Weights for Double Inner Dependence AHP 83
Shin-ichi Ohnishi, Takashi Furukawa, and Takahiro Yamanoi

Cyber Forensics: Representing and Managing Tangible Chain of Custody Using the Linked Data Principles 87
Tamer Fares Gayed, Hakim Lounis, Moncef Bari, and Rafek Nicolas

Towards an Artificially Intelligent System: Philosophical and Cognitive Presumptions of Hybrid Systems 97
Ondrej Vadinsky

Cartesian Intuitionism for Program Synthesis 102
Marta Franova

Cognitive Prognosis of Acquired Brain Injury Patients Using Machine Learning Techniques 108
Joan Serra, Josep Lluis Arcos, Alejandro Garcia-Rudolph, Alberto Garcia-Molina, Teresa Roig, and Josep Maria Tormos

Online Sliding Window Based Self-Organising Fuzzy Neural Network for Cognitive Reasoning 114
Gang Leng, Anjan Ray, Martin McGinnity, Sonya Coleman, and Liam Maguire

Inducing Models of Vehicular Traffic Complex Vague Concepts by Interaction with Domain Experts 120
Pawel Gora and Piotr Wasilewski

Decision-Making Mechanism to Organize the Agenda of a Guide-Robot 126
Jose Javier Rainer, Rafael Leon, Ramon Galan, and Agustin Jimenez

A Framework for the Implementation of Artificial Robotic Emotional Brain Based on Embryonic and Evolutionary 132
Fernando Cortez Sica, Ricardo de Oliveira Duarte, and Frederico Gadelha Guimaraes

Metacognitive Guidance in a Dialog Agent 137
Elizabeth McNany, Darsana Josyula, Michael Cox, Matthew Paisner, and Don Perlis

Linearithmic Corpus to Corpus Comparison by Sentence Hashing Algorithm SHAPD2 141
Dariusz Ceglarek

Bounded Metacognition 147
Darsana Josyula and Kenneth M'Bale

Ontologies in Industrial Enterprise Content Management Systems: the EC2M Project 153
Daniela Briola, Alessandro Amicone, and Dante Laudisa
