

Table of Contents

A 3D Convolutional Neural Network for Anomalous Propagation Identification <i>Hansoo Lee, Jonggeun Kim, and Sungshin Kim</i>	1
Towards a Robust Imputation Evaluation Framework <i>Anthony Chapman, Wei Pang, and George Coghill</i>	7
Comparison of Artificial Intelligence Based Oscillometric Blood Pressure Estimation Techniques: A Review Paper <i>Ekambir Sidhu and Voicu Groza</i>	14
Component Models for Embedded Systems in Industrial Cyber-Physical Systems <i>Luis Neto and Gil Goncalves</i>	24
Process Modeling and Parameter Optimization for Machine Calibration in Smart Manufacturing for Laser Seam Welding <i>Joao Reis and Gil Goncalves</i>	30
Adaptability in Smart Manufacturing Systems <i>Gil Goncalves, Joao Reis, Rui Pinto, and Michael Peschl</i>	36
A Software Architecture for Transport in a Production Grid <i>Leo van Moergestel, Erik Puik, and John-Jules Meyer</i>	43
